☎ (+1) 857-356-5018 | ✉ zzh@bu.edu | 🌟 Renovamen (3.5k stars) | 🌐 xiaohan-zou | 🌐 zzh.io

## Education

### Boston University

M.S. in Computer Science

Boston, MA

09/2021 – 01/2023

### Tongji University

B.Eng. in Software Engineering

Shanghai, China

09/2016 – 07/2020

## Publications and Submitted Manuscripts

- **Xiaohan Zou**, Changqiao Wu, Lele Cheng, and Zhongyuan Wang. "TokenFlow: Rethinking Fine-grained Cross-modal Alignment in Vision-Language Retrieval", **submitted to ACM Multimedia 2022**.
- **Xiaohan Zou**, and Tong Lin. "Efficient Meta-Learning for Continual Learning with Taylor Expansion Approximation", **submitted to IJCNN 2022**.
- **Xiaohan Zou**, Cheng Lin, Yinjia Zhang, and Qinpei Zhao. "[To be an Artist: Automatic Generation on Food Image Aesthetic Captioning](#)", **ICTAI 2020**. (Acceptance Rate: 25%, **Oral Presentation**) [[Code](#)]
- **Xiaohan Zou**. "[A Survey on Application of Knowledge Graph](#)", **CCEAI 2020**.

## Research Experience

### Machine Learning Engineer Intern, Kuaishou Technology, Beijing

07/2021 – 04/2022

- Devised a new model-agnostic formulation for fine-grained cross-modal semantic alignment and subsumed the recent popular works into the proposed scheme
- Proposed a video-text retrieval method which is competitive when compared with the SoTA approaches with heavy model design by only altering the similarity function, **submitted to ACM Multimedia 2022**
- Developed a PyTorch library for video-text retrieval which is benefiting the group members' research work

### Research Intern, Peking University, Beijing

08/2020 – 01/2022

- Designed an efficient method for parameter importance estimation via Taylor expansion
- Proposed a fast meta-learning algorithm for continual learning problems, which expresses the gradient of meta-update in closed-form instead of using Hessian information, **submitted to IJCNN 2022**
- Outperformed SoTA methods while optimizing much more efficient in experiments on popular benchmarks

### Research Assistant, Tongji University, Shanghai [[Project](#)]

03/2020 – 06/2020

- Proposed a novel framework consisting of a single-attribute captioning module and an unsupervised text summarization module for generating aesthetic captions for food images, **published in ICTAI 2020**
- Designed a data filtering strategy inspired by TF-IDF method for building a [dataset](#) for this new task
- Designed two new evaluation criteria to assess the novelty and diversity of the generated captions
- Outperformed baselines and existed methods substantially in terms of diversity, novelty and coherence

### Research Intern, Peking University, Beijing

07/2018 – 08/2018

- Utilized the structure duality to boost the learning of two dual tasks based on shared hidden space
- Designed two denoising auto-encoders consisting of encoders and decoders of two traditional Seq2Seq neural machine translators to make use of unpaired data
- Outperformed strong baselines by 1.0 - 2.9 BLEU on IWSLT'15 and WMT'14 dataset

## Awards and Honors

### Bronze, China Collegiate Programming Contest (CCPC)

2018

### Second Prize, China Mathematical Contest in Modeling (CUMCM)

2017, 2018

## Skills

**Programming Languages:** Python, JavaScript/TypeScript, HTML/CSS, Java, C/C++, MATLAB

**Tools and Frameworks:** Git, PyTorch, Keras, scikit-learn, Linux, Vue, React, Django, LaTeX

**Languages:** Chinese (native), English (proficient, TOEFL: 106, GRE: 322)
