Education

Boston UniversityBoston, MAM.S. in Computer Science09/2021 - 01/2023Tongiji UniversityShanghai, ChinaB.Eng. in Software Engineering09/2016 - 07/2020

Publications and Submitted Manuscripts

- Xiaohan Zou, Changqiao Wu, Lele Cheng, and Zhongyuan Wang. "TokenFlow: Rethinking Fine-grained Cross-modal Alignment in Vision-Language Retrieval", submitted to ACM Multimedia 2022.
- Xiaohan Zou, and Tong Lin. "Efficient Meta-Learning for Continual Learning with Taylor Expansion Approximation", IJCNN 2022.
- Xiaohan Zou, Cheng Lin, Yinjia Zhang, and Qinpei Zhao. "To be an Artist: Automatic Generation on Food Image Aesthetic Captioning", ICTAI 2020. (Acceptance Rate: 25%, Oral Presentation) [Paper]
- Xiaohan Zou. "A Survey on Application of Knowledge Graph", CCEAI 2020. [Paper]

Research Experience

Machine Learning Engineer Intern, Kuaishou Technology, Beijing

07/2021 - 04/2022

- Devised a new model-agnostic formulation for fine-grained cross-modal semantic alignment and subsumed the recent popular works into the proposed scheme
- Proposed a video-text retrieval method which is competitive when compared with the SoTA approaches with heavy model design by only altering the similarity function, submitted to ACM Multimedia 2022
- o Developed a PyTorch library for video-text retrieval which is benefiting the group members' research work

Reseach Intern, Peking University, Beijing

08/2020 - 01/2022

- Designed an efficient method for parameter importance estimation via Taylor expansion
- Proposed a fast meta-learning algorithm for continual learning problems, which expresses the gradient of meta-update in closed-form instead of using Hessian information, accepted by IJCNN 2022
- o Outperformed SoTA methods while optimizing much more efficient in experiments on popular benchmarks

Research Assistant, Tongji University, Shanghai [Project]

03/2020 - 06/2020

- Proposed a novel framework consisting of a single-attribute captioning module and an unsupervised text summarization module for generating aesthetic captions for food images, published in ICTAI 2020
- o Designed a data filtering strategy inspired by TF-IDF method for building a dataset for this new task
- Designed two new evaluation criteria to assess the novelty and diversity of the generated captions
- o Outperformed baselines and existed methods substantially in terms of diversity, novelty and coherence

Reseach Intern, Peking University, Beijing

07/2018 - 08/2018

- o Utilized the structure duality to boost the learning of two dual tasks based on shared hidden space
- Designed two denoising auto-encoders consisting of encoders and decoders of two traditional Seq2Seq neural machine translators to make use of unpaired data
- Outperformed strong baselines by 1.0 2.9 BLEU on IWSLT'15 and WMT'14 dataset

Awards and Honors

Bronze, China Collegiate Programming Contest (CCPC) **Second Prize**, China Mathematical Contest in Modeling (CUMCM)

2018

2017, 2018

Skills

Programming Languages: Python, JavaScript/TypeScript, HTML/CSS, Java, C/C++, MATLAB Tools and Frameworks: Git, PyTorch, Keras, scikit-learn, Linux, Vue, React, Django, LATEX Languages: Chinese (native), English (proficient, TOEFL: 106, GRE: 322)
